PROFILE

Skilled Java Developer for developing robust, scalable, and high-performance web applications. Proficient in Core Java programming language, with expertise in Spring, Spring Boot frameworks, and technologies like Maven and Git. Expertise in developing **RESTful** web services and **microservices** architecture. Familiar with Linux, Docker, Kubernetes Jenkins. Open Source Contributor. Passionate about innovation, I enjoy solving challenges and delivering it to the real world.

EDUCATION

B.E. in Computer Engineering, GTU

2021-2025

CGPA : 8.99

Surat, Gujarat

EXPERIENCE

Finlogic Technologies (NJ Group)

July 2025 - Present

Deputy Assistant Manager

Surat, Gujarat

- * Worked as a Full Stack Java Developer, gaining hands-on experience with Spring and Spring Boot frameworks. Developed expertise in the Insurance domain by integrating multiple third-party services, optimizing existing codebases, and leading migration efforts from Spring 5 to Spring 6 with React for modernized, high-performance applications.

Narola Infotech

Jan 2025 - June 2025

Software Engineer Intern

Surat, Gujarat

- * Worked as a Java Developer Intern, gain experience in Java, Advance Java Technologies.
- * Gained experience in version control using Git for efficient collaboration and code management.

TECHNICAL SKILLS

Languages	Java, Javascript, SQL
Framework	Spring, Spring Boot, Hibernate/JPA, JQuery, Bootstrap, React
Technology	Git, GitHub, Postman, Swagger, Maven, JIRA, Docker, Kubernetes, Jenkins, AWS - EC2, RDS, S3, Lambda
Databases	Oracle, MySQL

PERSONAL PROJECTS

Health Insurance System: Microservice Project | Java, Spring Boot | Ongoing Project 

- Designed and developed a Health Insurance System using a **microservices** architecture to streamline insurance processes, including **application registration**, **eligibility determination**, **data collection**, and **beneficiary management**. Integrated services such as **correspondence generation** and **administrative functionalities**, ensuring scalability and modularity through Spring Boot and Eureka Server.

QuickSplit: Split Your Expences Quickly | Java, Spring boot, JavaScript, MySQL 

- A fintech web app for seamless group **expense** management, featuring **automated debt calculations**, customizable expense splits, **dynamic debt simplification**, and personalized user profiles. Built with **Java**, **Spring Boot**, and **SQL** for a robust backend, and a responsive JavaScript front-end for an intuitive user experience.

Ride Hailing System | Java, Servlet, JSP, JPA, Flyway, MySQL 

- Developed a full-stack backend system for a ride hailing platform similar to Uber using **Java**, **Servlets**, and **JSP** to manage user interactions, ride bookings, and real-time status tracking. Integrated **JPA (Hibernate)** for ORM and **MySQL** as the relational database. Used **Flyway** for database version control and schema migrations.

Blood Bank Management System | Java, Servlet, JSP, JDBC 

- Developed a web application to connect blood donors and banks using **Java**, **JSP**, **Servlets**, and **JDBC**. Implemented features like blood camp management, email notifications using **JavaMail**, and bot protection via **Google reCAPTCHA**. Used **Bootstrap**, **jQuery**, and **Maven** for a responsive UI and project management.
