PROFILE

Skilled Java Developer for developing robust, scalable, and high-performance web applications. Proficient in Core Java programming language, with expertise in Spring, Spring Boot frameworks, and technologies like Maven and Git. Expertise in developing **RESTful** web services and **Microservices** architecture. Familiar with Linux, Docker, Kubernetes, Jenkins. Open Source Contributor. Passionate about innovation, I enjoy solving challenges and delivering it to the real world.

EDUCATION

B.E. in Computer Engineering, GTU

2021-2025

CGPA : 8.99

Surat, Gujarat

EXPERIENCE

Finlogic Technologies (NJ Group)

July 2025 – Present

Deputy Assistant Manager

Surat, Gujarat

- * Working as a Full Stack Java Developer, building and maintaining scalable, secure, and high-performance financial applications using **Spring** and **Spring Boot**.
- * Developed and maintained core functionalities for **ULIP (Unit Linked Insurance Plan)** products, including brokerage calculations, policy transaction processing, and business-rule validations.
- * Implemented transaction validation and company-end integration workflows to ensure accurate fund allocation, policy servicing, and compliance with insurance business requirements.
- * Collaborated on modern UI development using **React**, enabling responsive, user-friendly interfaces for internal and client-facing financial systems.

Elite Core Web Solutions

May 2024 - June 2025

Software Engineer

Surat, Gujarat

- * Gained hands-on experience with Java, Spring, and Spring Boot frameworks. Contributed to the development of a logistics-based application and collaborated on frontend development using JavaScript frameworks to implement and enhance business features.

TECHNICAL SKILLS

Languages	Java, Javascript, SQL
Framework	Spring, Spring Boot, Hibernate/JPA, React, JQuery, Bootstrap
Technology	Docker, Kubernetes, Jenkins, AWS - EC2, RDS, S3, Lambda, Maven, Git, GitHub
Databases	Oracle, MySQL, MongoDB

PERSONAL PROJECTS

Health Insurance System: Microservice Project | *Java, Spring Boot*

- Designed and developed a Health Insurance System using a **microservices** architecture to streamline insurance processes, including **application registration**, **eligibility determination**, **data collection**, and **beneficiary management**. Integrated services such as **correspondence generation** and **administrative functionalities**, ensuring scalability and modularity through Spring Boot and Eureka Server.

QuickSplit: Split Your Expenses Quickly | *Java, Spring boot, JavaScript, MySQL*

- A fintech web app for seamless group **expense** management, featuring **automated debt calculations**, customizable expense splits, **dynamic debt simplification**, and personalized user profiles. Built with **Java**, **Spring Boot**, and **SQL** for a robust backend, and a responsive JavaScript front-end for an intuitive user experience.

MoneyMate | *Java, Spring boot, MySQL, React*

- MoneyMate is a personal finance management application that helps users track income and expenses, organize transactions by categories, and visualize spending patterns through interactive charts and analytics. It provides a centralized dashboard with personalized insights and spending trends. The system simplifies budgeting by offering quick access to transactions, spending breakdowns.
